

2005 Vol. 33: No. 1

Original reports

- | | | |
|---|----|--|
| Total fluoride intake in children aged 22–35 months in four Colombian cities | 1 | Á. M. Franco, S. Martignon, A. Saldarriaga, M. C. González, M. I. Arbeláez, A. Ocampo, L. M. Luna, E. A. Martínez-Mier & A. E. Villa |
| Response rate and nonresponse bias in a questionnaire survey of dentists | 9 | P. Parashos, M. V. Morgan & H. H. Messer |
| Relationships between lifestyle and dental health behaviors in a rural population in Japan | 17 | S. Harada, R. Akhter, K. Kurita, M. Mori, M. Hoshikoshi, H. Tamashiro & M. Morita |
| The social determinants of oral health: new approaches to conceptualizing and researching complex causal networks | 25 | J. T. Newton & E. J. Bower |
| Risk indicators for oral candidiasis and oral hairy leukoplakia in HIV-infected adults | 35 | A. Chattopadhyay, D. J. Caplan, G. D. Slade, D. C. Shugars, H.-C. Tien & L. L. Patton |
| Assessment of risk factors for oral leukoplakia in West Virginia | 45 | M. A. Fisher, J. E. Bouquot & B. J. Shelton |
| Social and biological early life influences on severity of dental caries in children aged 6 years | 53 | M. A. Peres, M. do Rosário Dias de Oliveira Latorre, A. Sheiham, K. G. Peres, F. C. Barros, P. G. Hernandez, A. M. N. Maas, A. R. Romano & C. G. Victora |
| Changes over 5 years in utilization of dental care by a Swedish age cohort | 64 | K. Ståhltnacke, B. Söderfeldt, L. Unell, A. Halling & B. Axtelius |
| Antidepressant xerogenic medications and restoration rate | 74 | D. B. Rindal, W. A. Rush, D. Peters & G. Maupomé |

2005 Vol. 33: No. 2

Commentary

- | | | |
|---|----|------------------------------|
| Improving the oral health of older people: the approach of the WHO Global Oral Health Programme | 81 | P. E. Petersen & T. Yamamoto |
|---|----|------------------------------|

Original reports

- | | | |
|--|-----|---|
| The life course approach: explaining the association between height and dental caries in Brazilian adolescents | 93 | B. Nicolau, W. Marcenes, P. Allison & A. Sheiham |
| Oral white patches in a national sample of medical HIV patients in the era of HAART | 99 | M. Marcus, C. A. Maida, J. R. Freed, F. Younai, I. D. Coulter, C. Der-Martirosian, H. Liu, B. Freed, N. Guzmán-Becerra & M. Shapiro |
| Validation of a Chinese version of the Dental Anxiety Inventory | 107 | S. K. S. Ng, M. E. A. Stouthard & W. Keung Leung |
| Effectiveness of health care worker training on the oral health of elderly residents of nursing homes | 115 | R. Nicol, M. P. Sweeney, S. McHugh & J. Bagg |
| Cross-cultural validation of a short form of the Oral Health Impact Profile for temporomandibular disorders | 125 | M. Segù, V. Collesano, S. Lobbia & C. Rezzani |
| Dentist–assistant communication style: perceived gender differences in The Netherlands and Northern Ireland | 131 | R. C. Gorter & R. Freeman |
| Development and validation of the Manchester orofacial pain disability scale | 141 | V. R. Aggarwal, M. Lunt, J. M. Zakrzewska, G. J. Macfarlane & T. V. Macfarlane |
| Factors related to satisfaction with dental care among 23-year olds in Norway | 150 | E. Skaret, E. Berg, M. Raadal & G. Kvale |
| Book review | 158 | R. Freeman |

2005 Vol. 33: No. 3

Original reports

- | | | |
|---|-----|---|
| Use of the Significant Caries Index in quantifying the changes in caries in Switzerland from 1964 to 2000 | 159 | <i>T. Marthaler, G. Menghini & M. Steiner</i> |
| The association between tooth loss and the self-reported intake of selected CVD-related nutrients and foods among US women | 167 | <i>H.-C. Hung, G. Colditz & K. J. Joshipura</i> |
| Dental trauma and its association with anatomic, behavioral, and social variables among fifth and sixth grade schoolchildren in Jerusalem | 174 | <i>H. D. Sgan-Cohen, G. Megnagi & Y. Jacobi</i> |
| The role of dentist, practice and patient factors in the provision of dental services | 181 | <i>D. S. Brennan & A. J. Spencer</i> |
| The Children's Fear Survey Schedule-Dental Subscale in Japan | 196 | <i>Y. Nakai, T. Hirakawa, P. Milgrom, T. Coolidge, M. Heima, Y. Mori, C. Ishihara, N. Yakushiji, T. Yoshida & T. Shimono</i> |
| What do children's global ratings of oral health and well-being measure? | 205 | <i>A. Jokovic, D. Locker & G. Guyatt</i> |
| Comparison of radiographic and clinical diagnosis of approximal and occlusal dental caries in a young adult population | 212 | <i>M. S. Hopcraft & M. V. Morgan</i> |
| Routine oral examination: differences in characteristics of Dutch general dental practitioners related to type of recall interval | 219 | <i>T. G. Mettes, J. J. M. Bruers, W. J. M. van der Sanden, E. H. Verdonchot, J. Mulder, R. P. T. M. Grol & A. J. M. Plasschaert</i> |
| A follow-up study of patients with subjective symptoms related to dental materials | 227 | <i>G. B. Lygre, N. R. Gjerdet & L. Björkman</i> |
| Letter to the Editor | 235 | <i>B. M. Golam Kibria</i> |
| Response | 237 | <i>W. M. Thomson</i> |

2005 Vol. 33: No. 4

Symposium papers

- | | | |
|--|-----|--|
| Introduction to the Symposium | 239 | <i>C. Pine</i> |
| Concepts of risk in dental public health | 240 | <i>B. A. Burt</i> |
| The complex oral microflora of high-risk individuals and groups and its role in the caries process | 248 | <i>D. Beighton</i> |
| Cariogram – a multifactorial risk assessment model for a multifactorial disease | 256 | <i>D. Bratthall & G. H. Petersson</i> |
| Caries risk assessment: methods available to clinicians for caries detection | 265 | <i>S. Tranæus, X.-Q. Shi & B. Angmar-Månsson</i> |
| Sociobehavioural risk factors in dental caries – international perspectives | 274 | <i>P. E. Petersen</i> |
| Original reports | | |
| Discrepancies between self-ratings of and satisfaction with oral health in two older adult populations | 280 | <i>D. Locker & B. Gibson</i> |
| Psychometric properties of the Revised Dental Beliefs Survey | 289 | <i>T. Coolidge, M. Heima, S. E. Coldwell, P. Weinstein & P. Milgrom</i> |
| An assessment of teenagers' perceptions of dental fluorosis using digital simulation and web-based testing | 298 | <i>M. Edwards, L. M. D. Macpherson, D. R. Simmons, W. H. Gilmour & K. W. Stephen</i> |
| Psychometric properties of the Brazilian version of the Oral Health Impact Profile-short form | 307 | <i>B. H. de Oliveira & P. Nadanovsky</i> |
| Announcement | 315 | |
| Erratum | 316 | |

2005 Vol. 33: No. 5

Original reports

- | | | |
|--|-----|--|
| Fluoride exposure from ingested toothpaste in 4–5-year-old Malaysian children | 317 | <i>B. S. Tan & I. A. Razak</i> |
| Oral health-related quality of life for 8–10-year-old children: an assessment of a new measure | 326 | <i>G. Humphris, R. Freeman, B. Gibson, K. Simpson & H. Whelton</i> |
| Caries experience in the primary dentition among French 6-year-olds between 1991 and 2000 | 333 | <i>C. Adam, A. Eid, P. J. Riordan, M. Wolikow & F. Cohen</i> |
| Periodontal health and oral mucosal lesions as related to occupational exposure to acid mists | 341 | <i>M. I. P. Vianna, V. S. Santana & W. McKelvey</i> |
| Evidence for putting the calculus:caries inverse relationship to work | 349 | <i>R. M. Duckworth & E. Huntington</i> |
| Reliability and validity of the Modified Dental Anxiety Scale (MDAS) in a Turkish population | 357 | <i>E. P. Tunc, D. Firat, O. D. Onur & V. Sar</i> |
| Discrimination of functional capacity for oral hygiene in elderly Spanish people by the Barthel General Index | 363 | <i>P. Ruiz-Medina, M. Bravo, J. A. Gil-Montoya & J. Montero</i> |
| Childhood circumstances, psychosocial factors and the social impact of adult oral health | 370 | <i>A. E. Sanders & A. J. Spencer</i> |
| Derivation and validation of the short version of the Malaysian Oral Health Impact Profile | 378 | <i>R. Saub, D. Locker & P. Allison</i> |
| Development of a new questionnaire to assess pain-related limitations of daily functions in Japanese patients with temporomandibular disorders | 384 | <i>M. Sugisaki, K. Kino, N. Yoshida, T. Ishikawa, T. Amagasa & T. Haketa</i> |

2005 Vol. 33: No. 6

Guest editorial

- | | | |
|--|-----|-----------------------|
| Strengthening the prevention of oral cancer: the WHO perspective | 397 | <i>P. E. Petersen</i> |
|--|-----|-----------------------|

Commentary

- | | | |
|--|-----|--|
| For debate: problems with the DMF index pertinent to dental caries data analysis | 400 | <i>J. M. Broadbent & W. M. Thomson</i> |
|--|-----|--|

Original reports

- | | | |
|--|-----|---|
| Exposure to 'ideal' facial images reduces facial satisfaction: an experimental study | 410 | <i>J. T. Newton & G. Minhas</i> |
| The theory of reasoned action and patient compliance during orthodontic treatment | 419 | <i>A. Bos, J. Hoogstraten & B. Prahl-Andersen</i> |
| Changes in health over time in patients with symptoms allegedly caused by their dental restorative materials | 427 | <i>A. Tillberg, A. Berglund, L. Mårell, J. Bergdahl, N. Eriksson, G. Lindén, B. Stenberg & L. Widman</i> |
| Photographs as a means of assessing developmental defects of enamel | 438 | <i>H. M. Wong, C. McGrath, E. C. M. Lo & N. M. King</i> |
| Dental care and HIV-infected individuals: are they equally treated? | 447 | <i>M. Giuliani, C. Lajolo, G. Rezza, C. Arici, S. Babudieri, P. Grima, C. Martinelli, E. Tamburrini, J. Vecchiet, M. S. Mura, R. Cauda & M. Tumbarello for the BSAHOD study group</i> |
| Examining the association between parenting stress and the development of early childhood caries | 454 | <i>C. Tang, R. B. Quinonez, K. Hallett, J. Y. Lee & J. K. Whitt</i> |
| Influence of the patient's race on the dentist's decision to extract or retain a decayed tooth | 461 | <i>E. D. Cabral, A. F. Caldas Jr & H. A. M. Cabral</i> |
