

Publishers Note

The *International Endodontic Journal* is extending its services to authors and readers by facilitating the publication of resources such as video images and power point presentations. The journal has so far included illustrations and tables. It is now possible to include other illustration formats and data collections, to be published online only as Supporting Information. Supporting Information is hosted on Wiley InterScience in the 'Supporting Information' section of the article, and is available to subscribers. The material displays as a legend and a link to the Supporting Information. A reference is also included in the printed article.

Authors will be able to provide graphic information resources in various formats, such as video Imaging and 3D illustrations.

An example of Supporting Information may be found in the online version of this Publisher's Note:

- **Movie Clip S1.** 3D microtomography animation of a maxillary central incisor with access cavity.

Authors are invited to visit the Author Guidelines to explore the possibilities of supplying an article with Supporting Information. The following formats are encouraged:

- PDF for more complex, layout-dependent text or page-based material. Acrobat files can be distilled from Postscript by the Publisher, if necessary.
- GIF or JPEG for still graphics. Graphics supplied as EPS or TIFF are also acceptable.
- MPEG or AVI for moving graphics.

Complete *International Endodontic Journal* Author Guidelines are available at <http://www.wiley.com/bw/submit.asp?ref=0143-2885&site=1>

General author guidelines on how to prepare Supporting Information can be found at: <http://www.blackwellpublishing.com/bauthor/suppmat.asp>
