

New Associate Editor

Min-Kai Wu has recently retired from his post in ACTA, Amsterdam, The Netherlands and as a consequence has stepped-down as Associate Editor with responsibility for papers on canal filling. I would like to thank Min-Kai for his exceptional contribution to the IEJ and

particularly for his work on microleakage. Dr Gustavo De-Deus, Rio de Janeiro, Brazil has agreed to replace Min-Kai and will start from immediate effect.

Gustavo was awarded his DDS degree in 1996 and his certificate in Endodontics from Rio de Janeiro State University in 1997. In 2004, he received his Master in Science degree in Materials Science Engineering from the Catholic University of Rio de Janeiro; his PhD was awarded in Endodontics by the Rio de State University in 2009. Gustavo has experience in experimental research and has published a number of scientific papers in world-leading peer-reviewed journals in the endodontic field. Gustavo has lectured extensively within Brazil and also internationally. Gustavo is currently an Adjunct Professor at the Veiga de Almeida University and Federal Fluminense University and in private practice limited to Endodontics in Ipanema, Rio de Janeiro, Brazil.

Paul Dummer
Editor in Chief
