

Erratum

In [1], the following error was published on page 136, paragraph 4:

Although this study was designed and executed well, the authors failed to report the color difference thresholds obtained using the various formulas. The good news, however, is that some threshold values can be extrapolated from the article. Based on one of the figures in the article, CIED2000

perceptibility and acceptability thresholds were approximately 1.2 and 1.6, respectively. Based on another of the figures and the literature, this might correspond to CIELAB values of approximately 1.5 to 1.8 and 4.0, respectively.

The last sentence was incorrect and should have read:

Based on another of the figures and the literature, this might

correspond to CIELAB values of approximately 1.5 to 1.8 and 2.0 to 2.4, respectively.

We apologize for this error.
