B.D.S. Examination, Oct. 2014

ORAL SURGERY & ANAESTHESIA

(BDS-014)

(Old Course)

Time: Three Hours]

[Maximum Marks : 50

Note : Attempt **all** questions. Draw labelled diagramm wherever necessary. Use separate copy for part-I & part-II.

PART - I

1. Define local anaesthesia, and describe its mechanism of action in detail. 8
2. Classify midface fractures. How will you diagnose, investigate and treat an impacted Le fort-I fracture. 8

P.T.O.

3. Write short notes on: 3 each
- (a) Secondary Haemorrhage
 - (b) Sialoliths
 - (c) TMJ dislocation

PART - II

1. Classify odontogenic cysts of the jaw. How will you treat a case of odontogenic keratocyst in a paediatric patient at the molar region of mandible. 8
2. Describe the principles of antibiotics in the patients of facio maxillary infections. 8
3. Write short notes on: 9
- (a) Root form dental implant
 - (b) Autoclaving
 - (c) War lines

Oral Surgery & Anaesthesia

(BDS - 014)

(Old Course)

Time : Three Hours]

[Maximum Marks :50

Note : Attempt all questions. Draw labelled diagram wherever necessary. Use separate copy for part I and part II.

Part - I

1. Discuss the surgical anatomy of maxillary sinus. How will you diagnose, investigate and treat a case of oro-antral fistula in relation to maxillary first molar.

8

P.T.O.

2. Classify local anaesthetic drugs. Describe classical inferior alveolar nerve block. 8
3. Write short notes on:
- (a) TIC-DOLOREUX 3
 - (b) RED-LINE 3
 - (c) PRE-MEDICATION 3

Part - II

4. Classify T.M.J. ankylosis. How will you treat a six year girl child with bilateral TMJ ankylosis. 8
5. How do you differentiate a favourable angle fracture from an unfavourable one. Discuss the best treatment for an unfavourable angle fracture having a tooth in fracture line. 8
6. Write short notes on:
- (a) Dental implant 3
 - (b) F.N.A.C. 3
 - (c) Extraction in a patient with Hepatitis 'B' positive. 3

Oral Maxillofacial Surgery

(BDS-014)

Time: Three Hours / [Maximum Marks : 70]

Note : Attempt all questions. Draw labelled diagrams wherever necessary. Answer the questions to the point. Use separate copy for Part - I and Part - II.

PART - I

1. Define Fracture. Discuss in details about the classification of Mandibular Fracture. How do you manage a case of Mandibular Fracture at Angle region.

11

P.T.O.

2. Write notes on : 3×4=12
- (a) Difference between Oro-antral fistula & Oro-antral communication.
- (b) Immediate v/s delayed dental implants.
- (c) Composition of 2% L.A.

3. Define :

(a) CYST

(b) Tumour

(c) Osteomyelitis

(d) Ameloblastoma

(e) Guérine Sign

(f) Exodontia

PART - II

4. Define impacted tooth, classify Impacted Mandibular Third Molar. Discuss in details about the clinical features, diagnosis & man-

agement of Mesio-Angular Impacted Mandibular Third Molar. 11

5. Short notes on :

(a) War Lines

(b) Sterilization

(c) Extraction of recent myocardial infarction patient^s.

6. Define :

(a) Blow out fracture

(b) Diplopia

(c) Distraction Osteogenesis

(d) Hypersensitivity

(e) TMJ Ankylosis

(f) Aneamia

- (d) What will be the maximum safe dose of L.A in a 80 yr old patient?
- (e) Latest tests in Diabetes Mellitus.
- (f) Hare-Lip

Oral Maxillofacial Surgery

(BDS-014)

Time : Three Hours / [Maximum Marks : 70]

Note : Attempt all questions. Draw labelled diagrams wherever necessary. Answer the questions to the point. Use separate copy for Part - I and Part - II.

Part - I

1. Discuss applied anatomy, classification, diagnostic feature of a unilateral condylar fracture. How does the treatment protocol differ in various age groups of patients?

5148(N)\70014

P.T.O.

2. Write notes on:

4 × 3 = 12

Part - II

(a) TMJ dislocation

(b) Primary spaces

(c) TNM classification

(d) Sialolith in sub - mandibular gland

3. Define:

6 × 2 = 12

(a) Enophthalmos

(b) Tachyphylaxis

(c) Local anaesthesia

(d) Parasthesia

(e) Impacted fracture

(f) F.N.A.C.

4. How do you assess, prepare, investigate and manage a case of Pell & Gregory class - I, Position - B, & Horizontal, impacted mandibular third molar? 11

5. Write in short:

4 × 3 = 12

(a) Submandibular space infection

(b) Classifications of ameloblastoma

(c) Palatal flaps to close Oro-Antral fistula

(d) Healing of Bone

6. Give brief answers:

6 × 2 = 12

(a) Name of cranial nerves

(b) Genioplasty

(c) Transport Distraction
