Conservative Dentistry Including Endodontics

(BDS - 012)

Time : Three Hours]

[Maximum Marks : 70

Note : Attempt all questions. Use separate copy for Part-A and Part-B.

Part-A

1. Enumerate the cavity design for a gold indirect restoration on a maxillary first molar presented with the following clinal condition. The concerned tooth has a large carious lesion involving the distal and occlusal surface along with the distopalatal groove (DOP). The lesion involved the oblique ridge. The cavity is shallow in general except in the central fossa region where the RDT (remaining dentin thickness) is around 0.8 mm. 10
2. Mention various tooth whitening agents. Describe in detail the "in-office" whitening technique. 10
