

Subject Index to Volume 46

Volume 46

January	EVIDENCE BASED DENTISTRY, pages 1–170
April	RESTORATIVE DENTISTRY, pages 171–434
July	DENTAL INFORMATICS, pages 435–622
October	DENTAL THERAPEUTICS UPDATE, pages 623–902

Note: Page numbers of article titles are in **boldface** type

A

- Abuse, ethical, 33
- Acetaminophen, action of, 696
adverse effect of, 696
in pediatrics, 711–712
- Acid etching, 277–278
dentin following, 213, 214
- Adhesive(s), dental. See *Dental adhesives*.
for amalgam restorations, 352
- Adrenoceptors, actions of, 733, 734
- Adults, inhalational and enteral conscious
sedation for, **781–802**
older. See *Older adults*.
- Aging, nonphysiologic aspects of, 872–877
patient compliance in, 876
pharmacologic changes associated
with, 877–881
physiologic changes associated with,
871
psychosocial factors in, 876–877
- Air abrasion, 175
advantages of, 196
air pressure for, 202
and high-speed drill, compared, 195,
196–197
benefits of, 188
bonded restorations and, 197
considerations for using, 197
continuous mode with exhaust, 200
continuous mode without exhaust, 200
contraindications to, 202
cutting rate in, 199–200
diagnosis of decay for, 192–193
directing particle stream in, 200
dynamics of, understanding of,
205–208
extremely conservative preparations
produced by, 195–197
goal of, 188
in conservative operative dentistry,
185–209
instruments for, development of,
185–186
nozzle diameter for, 202–203
selection of, 200
techniques and procedures for,
197–203
learning to use, 186–197, 197, 203
mechanisms of, 195
mistakes to avoid in use of, 204
particle type and size for, 203, 204
patient comfort and, 201, 202–203
patient preparation for, 198–199, 201
science of, and anatomy of teeth, 188
sensitivity of patient to, 201
steps in use of, 198
stream intensity or particle flow rate
for, 202
- Air-abrasive microdentistry system, value
of, 195
- Albuterol, in emergency, 821
- Alprazolam, 795–796
- Amalgam, as core material, 376
silver, for restoration of root-surface
caries, 388–390
- Amalgam restorations, 348–354
adhesive for, 352
complex, amalgam preparation for,
348–352
complex matrices for, 352–353
finishing of, 353, 354
longevity of, in posterior teeth,
308–311

- Amalgam restorations (*continued*)
preparations for, 176–178
resin-based composite, direct, for class
I and II cavities, 305–312
discussion of,
317–321
- Amalgapins, 351–352
- American Dental Association, standards for
products and, 41
- Analgesics, classification of, 691
combinations of, rational use of,
691–705
for children, 711–713
regimens of, 703–704
- Analytic studies, 53–55
- Anaphylaxis, drugs used in, 826
- Anesthesia, dental electronic, 730
general, definitions establishing
guidelines for, 768–770
intraosseous, 728
systems for, 728–730
local, 720
advances in agents and
techniques of, **719–732**
adverse drug reactions to,
747–757
diagnosis of, 748
allergic reactions to, 754
anxiety associated with,
techniques to overcome,
759
toxicity to, 747–750
management of, 750
prevention of, 749–750
signs and symptoms of,
747–749
vasoconstrictor reactions to,
750–752
practical management of,
752
prevention of, 752
signs and symptoms of,
751–752
- Anesthetics, amide, long-acting, 724–726
ester, 721
local, clinical pharmacology of,
720–726
ideal, 719
in children, 711
lingual infiltration of, 726–727
periodontal ligament injections
of, 727–728
sulfite antioxidant reactions to,
755
topical, concentration of, as factor in
efficacy, 762
duration of application of,
764–765
effective, and techniques, **759–766**
efficacy of, factors influencing,
762
studies of, 760–762
formulations of, 759, 760
site of application of, and
duration of, 763–764
- Angina/myocardial infarction, management
of, 827–828
- Antibiotics, and oral contraceptives,
653–664
clinical studies evaluating,
659–661
legal actions and opinions
concerning, 661
pharmacological basis of,
657–659
in dentistry, indications for, 635
in odontogenic infections, **623–633**
choice of antibiotics for,
626–627
culturing and, 626
factors influencing, 623
indications for use of, 625–627
mechanism of action of, 624–625
prophylactic, for endocarditis,
prosthetic joints, and surgery,
635–651
for immunosuppressed patients,
646–647
for orthognathic surgery, 645
for surgical removal of impacted
third molars, 645
in patients with prosthetic joints,
641–644
to prevent infective endocarditis,
635–641
- Antihistamine(s), 796
injectable, in emergency, 820–821
- Anti-inflammatory agents, nonsteroidal
(NSAIDs), actions, side effects, and
contraindications to, 692–693
adverse effects of, 680
efficacy, selection, and dosages
of, 693–697
for children, 712
in chronic pain, 684
- Antimicrobial agents, local delivery of, in
periodontal therapy, **665–677**
MEDLINE search to study,
666
- Application service providers, in dentistry,
477–491
- Argon lasers, for polymerization, 331

ART treatment technique, success rate of, 315

Articaine hydrochloride, 722–724

“Aspirin burn,” 865

Asthma, acute, management of, 826

Atropine, in emergency, 822

B

Bacteremia, after dental procedures, prevalence of, 636

Barbiturate sedation, for children, 811

Barbiturates, 797–798
administration of, 798–800
recovery from, 800–801

Baseline problem, research and, 42–43

Benzodiazepines, adverse effects of, 792
dependence liability of, 792
for adult patients, 790–796
for sedation of children, 808–809
in emergency, 824–825

Biostatistical consultation, for research, **137–155**

Blue light-emitting diode, for polymerization, 332

Bonding, philosophies of, dentin adhesive systems and, 330–331

Bonding agent(s), application of, for resin composites, 342–344

Bronchospasm, management of, 826

Bupivacaine, 724–726

C

CAD/CAM procedure, **405–426**
adhesive seating for, 419–420, 423, 424
case reports of use of, 412–420
computer-aided design for, 408–409
computer-aided machining for, 409–411
development and improvements in, 406
discussion of, 420–425
for chair-side inlays and partial crowns, 412–414, 415
for chair-side partial and full crowns, 414–415, 416, 417
full crown design on screen for, 416–418, 419, 420, 421, 422
history of, 405–406
intraoral three-dimensional scanning camera for, 406–407

multitasking computer-aided design/ computer-aided machining for, 418–419, 422
scanning principle of, 407, 408
semichair-side and laboratory computer-aided design/ computer-aided machining for, 411–412

Calcium channel blockers, as cause of gingival hyperplasia, 860–861
uses of, 860

Calcium hydroxide liner, 318

Candidiasis, altered immunity and, 863–864

Carbohydrate, oral, in emergency, 821

Cardiac arrest, management of, 827

Cardiovascular disease, vasoconstrictors in, 737–739

Caries, detection of, 172
caries-detecting dye for, 193–194
lasers for, 194–195
incidence of, 247
magnification of, 172–173
nonvital, air abrasion in, 207
preparations for, conservative, **171–184**
restoration in, 173
risk of, classification of, 400, 401
root-surface, etiology of, 386–387
factors controlling, 388
incidence of, 386
materials for restoration of, 388–392
rapidly progressing, 387
slowly progressing, 387
treatment of, **385–404**

secondary, and fluoride-releasing dental materials, **247–276**
definition of, 251
development of, risk factors for, 254, 255–256
in-vitro, and fluoride-releasing dental materials, 259–262
locations of, 251, 263–264
prevention of, 254
restoration replacement in, 249
studies of, 254
treatment of, as disease, 599–600, 606
future developments in, 400–402
nonsurgical, 172
vital, air abrasion in, 206–207

Case-control studies, design of, to yield insight and identify prognostic factors, 130
in evaluation of causation, 121–123

- Case simulation programs, interactive, 577
- CASE STUDIES for Dentistry, 577–581
future of, 601–602
- Causation, and risk factors, in dentistry, key elements to determine, **117–126**
evaluation of, case-control studies in, 121–123
key elements for, 118
magnitude of, 125
prospective cohort studies in, 120–121
randomized controlled trials in, 123–124
reporting of magnitude of risk factor in, 119–120
research studies for, 118–125
studies of, 117–118
bias in, 124–125
- Cavity preparation, oscillating instruments for, 332
- Celecoxib, 680, 681, 682
pharmacokinetics and drug interactions of, 681
- Cements, glass ionomer. See *Glass ionomer cements*.
luting, for posts, 371
- Ceramic inlays and onlays,
contraindications to, 356–357
indications for, 356
- Ceramics, core-strengthened, 355
for inlays and onlays, 355
glass, 355
strengthened, 355
- Chemical injuries of mouth, 865
- Children. See *Pediatric dental patients*.
- Chloral hydrate sedation, for children, 809–811
- Chlorhexidine, in periodontal therapy, 667, 668, 670–671, 672, 674
- Clinical decision making, 52
- Clinical dental practice, use of diagnostic data in, **87–115**
- Clinical trials, 53–54
- Cocaine, 741
- Cochrane Collaboration, 1–2
- Codeine, 699–701
for children, 712–713
- Cohort study(ies), 24–25
design of, to yield insight and identify prognostic factors, 130
inception, 66
- Compomers, 392
- Composite inlays and onlays,
contraindications to, 356–357
indications for, 356
- Composite resin(s), advantages of, 359
as core material, 377
bonding agent application for, 342–344
fluoride-releasing, 591, 615
for root-surface restorations, 390
materials used for, 344
matrix systems for, 343–344
placement of, 344–347
posterior, formation of contact area for, 347–348
posterior restorations using, 342
rebonding of, 348
- Composite resin restorations, direct, for class I and II cavities, 303–305
new developments in, 328–330
preparations for, 178–179, 180
- Composites, indirect composite materials and, 356
shade guide for, 316
- Computer(s), clinical decision making using, **521–538**
dental patient and, 522–523
for clinical decision making, 529–530
for diagnostics, 525–527, 529
for patient history and dental record, 523–524
for treatment planning and pretreatment, 527–529
handheld, applications of, 545–548
dental applications of, 548–551
description of, 539–540
features of, 540–545
in dentistry, **539–551**
software for, 546, 548–551
Dental Lexi-Drugs, 549
Dentalog, 549
DocAlert, 548
ePocrates QID, 548
ePocrates qRx, 548
Five-minute Clinical Consult, 549
Palm Corporate Dental Application, 550
STAT growth charts, 550–551
in dentistry, 477–478, 565, 575–576
recommendations for, 530–532

Computer systems, office, application
 service providers, 481-482
 benefits and drawbacks of, 482-486
 examples of, 486-488
 functions of vendor of, 489
 security and, 489
 hardware failures and, 480
 network failures in, 480-481
 operator error and, 479-480
 power failures and, 480
 software failures and, 480
 traditional, 478-481
 type of Internet connection for, 488

Concordance, diagnostic tests and, 108-109

Confidence-interval estimates, 140-141

Confidence intervals, 57

Convergence, diagnostic tests and, 108-109

Copper-band matrices, 353

Core-strngthened ceramics, 355

Correlation coefficient(s), intraclass,
 reliability of measurements and, 95
 reliability of measurements and, 95

Corticosteroids, and candidiasis, 864
 in emergency, 823

COX-1, 680

COX-2, 680

COX-2 inhibitors, **679-690**
 adverse effects of, 685-687
 cardiovascular effects of, 686-687
 currently under review by FDA, 687
 gastrointestinal effects of, 685-686
 renal effects of, 687
 selective, acute orofacial pain
 management with, 683-684
 analgesic efficacy and anti-inflammatory effect of, 681-683
 chronic orofacial pain management with, 684-685

Criteria for causality, 58-59

Cross-sectional surveys, 53

Crown segment, 215

Cyclooxygenase, in pain, 680

Cyclooxygenase-2 inhibitors. See *COX-2 inhibitors*.

Cyclosporine, as cause of gingival hyperplasia, 861-862

D

Data bases, electronic, for literature searches, 47-49

Data integration, fundamental informatics principles and, 606-610
 meaning of, to practicing dentist, **605-615**
 optimizing value of information in, 614-615
 transforming principles into practice, 610-614

Data management, for statistical research, 151-152

Decay, diagnosis of, 193

Decision analysis, diagnostic, 89-92

Decision making, clinical, 52

Dental adhesives, advantages and disadvantages of, 283
 "all-in-one," 290-293
 clinical trials of, 293-296
 cytotoxicity of, 221
 laboratory tests of, 296, 297
 new philosophies on, 290
 types of, 283

Dental anxiety scale, 773

Dental caries. See *Caries*.

Dental education, and continuing dental education, interactive multimedia patient simulations in, **575-587**
 basic science made clinically relevant, 581-582
 clinical problem solving in, 582
 continuing, and dental education, interactive multimedia patient simulations in, **575-587**
 background of, 589-590
 education courses and listings, on Web, 591
 emerging Web technologies, 600-601
 on World Wide Web, **589-604**
 instructional quality of, 592-595
 quality course review and, 596-600
 Web-based, location of, 590-592
 creation of standardized patients for, 583-584
 goal of, 576
 hard-to-find patients for, 582-583
 teaching of self-evaluation in, 584
 transfer problem in, 576-577

Dental materials, cytotoxicity of, 221-222

- Dental postoperative pain, in children, 710
management of, medications and dosage for, 714
protocol for, 715
recommendations for, 713–715
- Dental postoperative pin, in children, management of, **707–717**
- Dental practice, clinical, use of diagnostic data in, **87–115**
- Dental practitioners, statistical needs of, 138, 142–143
statistical training for, 143–144
treating older patients, precautions for, 881–882
- Dental procedures, infective endocarditis and, studies of, 637–638
prevalence of bacteremia after, 636
surgical, prevention of infection following, 644–645
- Dental research. See *Research*.
- Dental researcher(s), biostatistician and, 145–146
statistical needs of, 144–145
- Dentin, abnormal forms of, sealing of, problems associated with, 224–225
as porous barrier, 213
collagen banding in, 282–287
contaminated with bacteria, permeability of, 233–235, 236
effects of growth factors on, 236–238
following acid etching, 213, 214
fractured mineralized, 213, 214
hybridization of, 288, 291, 295
hydraulic conductance of, 217, 218
initial seal, restoration of, 220–221
middle, dentin tubules in, 278, 281
peripheral seal, restoration of, 220
permeability of, effects of dentin thickness on, 215–216
effects on restorative dentistry, **211–245**
intertubular, versus tubular permeability of, 225–229, 230
regional differences in, 216–218
postoperative sensitivity of, 217–218
sealing of, with resins, problems associated with, 222–224
thickness of, effects on permeability, 215–216
tubular structure of, 282
- Dentin adhesive systems, and bonding philosophies, 330–331
- Dentin bonding, as function of dentin structure, **277–301**
“wet-bonding” technique and, 287–288
- Dentin bonding systems, categories of, 278
- Dentin substrate, ideal, 278–290
- Dentist, practicing, meaning of data integration to, **605–615**
- Dentistry, clinical practice of, decision making in, 11
surgical component of, 11
evidence-based. See *Evidence-based dentistry*.
product testing in, 2
- Descriptive studies, 52–53
- Diabetic emergencies, management of, 828
- Diagnosis(es), validity of, and reference standard, 98–99
- Diagnostic data, principles of decision analysis and, 89–90
test characteristics and, 99–109
use and interpretation of, in diagnostic decision analysis, 89–90
- Diagnostic decision analysis, 89–92
threshold approach for, 90–92
use and interpretation of diagnostic data in, 89–90
- Diagnostic process, 88–89
- Diagnostic test(s), concordance and, 108–109
convergence and, 108–109
evidence-based dentistry in, 160
gold standard and new, contingency comparison between, 109
likelihood ratios and monograms for, 109–113
parallel testing with, 108
sensitivities, specificities, and likelihood ratios of, 102
series testing with, 107–108
- Diazepam, 793
for children, 808–809
- DICOM standard, advantages of, 566–567
as accepted standard, 566
committee, 568
conformance statement of, 568–569
description of, 566
in dentistry, American Dental Association and, 569–570
practical demonstrations of, 570–571
use and implication of, **565–573**

- in perspective, 567
 - latest version of, specialties supported by, 567–568
 - parts of, 568
 - streamlined, interoperability within, 571
 - groups participating in, 572–573
 - validation tests of, 571–572
- Digital imaging and communication in medicine. See *DICOM standard*.
- Dimension reduction procedure, 146
