

Index

Note: Page numbers of article titles are in **boldface** type.

A

- African American(s), children, prevalence of *Streptococcus mutans* in, 89
in New York City, prevalence of dental caries among, **57–65**
male, study of untreated syphilis in, 4–5
maternal transmission of *Streptococcus mutans* in, **87–101**
preterm low birth weight and periodontal disease among, **115–125**
urban, incidence of orofacial injuries in, 141

AIDS, periodontal disease and, 160

B

- Bacterial challenge, subgingival, host response to, among ethnic/racial group, 110–111
- Biomedical research, recruitment for, access to health care and, 7
confidence in efficacy of treatments and, 8
difficulties in, 4
educational level and, 8
potential unpleasantness of, interventions and, 7

C

- Caries, dental. See *Dental caries*.
- Charles Drew University of Medical Sciences, 127, 178
- Children, African American, prevalence of *Streptococcus mutans* in, 89
HIV-infected, oral manifestations in, clinical implications of, **159–174**
- Chlorhexidine, treatment using, effect on maternal transmission of *Streptococcus mutans*, 96–97

D

- Dental caries, analysis of, in HIV-infected children, 161
and composition of whole saliva in minority populations, **67–85**
causes of, 159
prevalence among African Americans in New York City, **57–65**
study of, clinical implications of, 63–64
data analysis in, 60
discussion of, 62
methods of, 59–60
results of, 60–62

Dental schools, recruitment of minorities to, 35

Dentist(s), ethnicity of population and, 30
visits to, by race/ethnicity, 33–36

E

Environmental factors, and health behavior, 25, 26–28

F

Forsyth Institute laboratories, 179

H

- Health, and health behavior, models for studying, 24–26
determinants of, 22–24
- Health behavior(s), and health, models for studying, 24–26
and health perceptions, understanding of, **21–39**
environmental factors and, 25, 26–28
predictors of, 25
- Health care issues, promotion of, minorities in communications professions and, 35–36

Health insurance, by race/ethnicity, 27–28

Health perceptions, and health behaviors, understanding of, **21–39**

Health provider(s), and patient-provider issues, 29

Hispanic population, in United States, 41–43

oral health promotion for, obstacles to, 43

Hispanic subgroups, in New York City, dental health status and treatment needs of, **41–55**

study of, discussion of, 51–53
methods of, 43–44
results of, 44–51

HIV-infected children, oral manifestations in, **159–174**

discussion of, 168–172
study of, caries prevalence and incidence of, 164–165
demographics and, 160–161
dental caries analysis and, 161
methods of, 160–163
oral mucosal lesion analysis and, 162, 165–166
periodontal disease analysis in, 162, 166–168
statistical analysis and, 162–163

Hospital, inner-city public, population served by, 128
profile of, 128

Huntsville Study, 12

I

IgG levels, *Porphyromonas gingivalis*, and low birth weight, 120, 121

Insurance, health, by race/ethnicity, 27–28

K

King/Drew Medical Center, 128

L

Low birth weight, IgG levels, and *Porphyromonas gingivalis*, 120, 121
in preterm infants, and periodontal disease among African Americans, studies of, 116–117
discussion of, 121–123
materials and methods in, 117–119

results of, 119–121

sample size and power in, 118

statistical analyses in, 118–119

and periodontal diseases, among African Americans, **115–125**
definition of, 115
predictors of, 120, 121

M

Meharry Medical College's School of Dentistry, 177, 178

Minority populations, composition of whole saliva and caries experience in, **67–85**

destructive periodontal diseases and, **103–114**

oral health of, regional research centers for, legacy of, **175–181**
research in. See *Research Centers, Regional, for Minority Oral Health*.

recruitment of, to dental schools, 35
underserved, orofacial injuries in, **127–139**

Mother, transmission of *Streptococcus mutans* by, in African American population, **87–101**

N

National Center for Bioethics, 11

National Health and Nutrition Examination Survey, 58

New York University College of Dentistry, 58–59, 179

Northeastern Minority Oral Health Research Center, 180

O

Oral health, minority, regional research centers for, legacy of, **175–181**
status of, determination of, conceptual framework for, 23–24

Oral health service, utilization of, and oral health status, factors affecting, 30, 31–33

Oral health status, utilization of oral health service and, factors affecting, 30, 31–33

Oral mucosal lesions, analysis of, in HIV-infected children, 162

- Orofacial injury(ies), in underserved minority populations, **127–139**
 and associated risk factors, 132–135
 and recurrent injury, 135–136
 discussion of, 136–137
 nature of injuries and, 131–132
 patient sociodemographics and, 130–131
 socioeconomic impacts of, 132
 spectrum of, 129
 studies of, background of, 128
 methods of, 129–130
 results of, 130–136
 substance use and, 133, 135
 incidence of, in urban African American population, 141
 psychosocial sequelae of, 145–152
 and correlates of, **141–157**
 study of, 142–156
 clinical implications
 observed in, 155–156
 patient characteristics in, 143
 patient compliance and, 153–154
 risk factors for injury and recurrent injury and, 143
 showing psychological distress, 144
 support needs during recovery and, 152–153
 University of California-LA/Drew Regional Research Center for Minority Oral Health Experience investigations, 142–156

P

- Periodontal disease(s), AIDS and, 160
 analysis of, in HIV-infected children, 162
 causes of, 159
 destructive, clinical and demographic parameters and, according to ethnic/racial group, 107, 108
 in minority populations, **103–114**
 incidence and progression of, 104–109
 risk indicators and risks associated with, 109–112
 Surgeon General's report on, 103–104
 preterm low birth weight and, among African Americans, **115–125**
Porphyromonas gingivalis, IgG levels, and low birth weight, 120, 121

- Posttraumatic stress disorder symptoms, following orofacial injuries, 146, 147, 148, 149, 150, 151
 Pregnancy, effect of, on maternal levels of *Streptococcus mutans*, 95
 Preterm infants, low birth weight, and periodontal diseases, among African Americans, **115–125**
 Psychosocial sequelae, of orofacial injuries, psychosocial sequelae of, and correlates of, **141–157**

R

- Regional Research Centers for Minority Oral Health. See *Research Centers, Regional, for Minority Oral Health*.
 Research Centers, Regional, for Minority Oral Health, 21, 30, 31, 32, 58, 127, 175, 181
 meetings of, 176–177
 Research centers, Regional, for minority oral health, goals of, 176
 legacy of, **175–181**

S

- Saliva, as complex secretion, 74–75
 functions of, 67
 whole, caries prediction and, protocol for, 76
 cariogenic organisms in, 68
 collection of, 68
 composition of, and caries experience, in minority populations, **67–85**
 microbiological assay of, 68–69
 results of, 69–74
 statistical analyses of, 69
 pathogenic bacteria in, by ethnicity, 71, 72–73
 study(ies) of, discussion of, 74–82
 materials and methods for, 68–69
 participants in, 68, 70
 smoking by participants in, and socioeconomic status, 68, 70
Streptococcus mutans, epidemiology of, 88–92
 findings from cross-sectional study, 89–90
 findings from longitudinal studies, 90–92
 maternal levels of, effect of pregnancy on, 95

Streptococcus mutans (continued)

- maternal transmission of, effect of
 - chlorhexidine treatment on, 96–97
 - effect of delivery on, 95–96
 - fidelity of, 93–95
 - in African American population, **87–101**
 - maternal attributes to, 95–97
- prevalence of, in African American children, 89
- in different ethnic populations, 88–89
- transmission of, 92–93

Syphilis, untreated, in African American male, study of, 4–5

T

-
- Tuskegee Legacy Project, **1–19**, 180
 - 3 City study, 13–14
 - 4 City study, 14–15

- and additional pilot summer studies, 12–13
- legacy of, 15
- origins of, 1–3
- proposed, significance of, 8–9
- questionnaire, development at workshop, 10–11
- summer pilot studies to develop, 9–10
- unanticipated societal benefits of, 11–12

Tuskegee syphilis study, background of, 3–8

U

-
- University of California in Los Angeles, 127
 - University of California-LA/Drew Regional Research Center for Minority Oral Health Experience, investigations of orofacial injuries, 142–156
