

## Index

*Note:* Page numbers of article titles are in **boldface** type.

### A

---

- Acanthosis nigricans, familial, 251  
Amalgam tattoo, 197–198  
Amphotericin B, 62  
Ankyloglossia, 11  
Anti-inflammatory agents, in oral mucositis, 177–178  
Antimicrobial agents, in oral mucositis, 178–179  
Antioxidants, in oral mucositis, 179–180  
Antiphospholipid syndrome, in lupus erythematosus, 137  
Aphthous stomatitis, recurrent, **31–47**  
    allergic factors in, 37–38  
    characteristics of, 32, 33  
    clinical manifestations and pathogenesis of, 39–40  
    epidemiology of, 32–33  
    etiologic factors in, 34–39  
    hereditary and genetic factors in, 37  
    immunologic factors in, 38–39  
    management of, 40–42  
    medical disorders associated with, 36–37  
    microbial factors in, 35–36  
    nutritional factors in, 39  
    psychologic stress and, 39  
Argyrosis, focal, 197–198  
Aspergillosis, 57  
Azoles, 59

### B

---

- Behçet's syndrome, 36, 255  
Blastomycosis, 58  
Bullous pemphigoid, juvenile, 248

### C

---

- Cancer, oral, anatomic sites of, 145

- clinical examination in, 148–149  
delay in diagnosis of, 149–150  
etiologic of, and risk factors of, 146–147  
genomics and, 154–155  
imaging in, 159  
immune system and, 147  
incidence of, 144  
leukoplakia, and squamous cell carcinoma, **143–165**  
molecular progression of, 153  
monoclonal antibodies for detection of, 158–159  
nutrition and, 148  
precancerous classification of, 153–154  
signs and symptoms of, 150–152  
stage at diagnosis and survival of, 145–146  
tobacco use and, 147–148  
viruses in development of, 148

- Candida infections, oral, 50  
    diagnosis of, 55–56  
Candida lesions, group I, classification of, 50–54  
    lesions associated with, 53–54  
Candidiasis, erythematous, 51  
    host factors associated with, 54–55  
    hyperplastic, 52–53  
    pseudomembranous, 50–51  
Candidiasis (candidosis), leukoplakia, and erythroplasia, 156  
Carcinogenesis, oral, 152–153  
Cardiovascular disease, in lupus erythematosus, 136  
Chickenpox, in children, 245–246  
Children, soft tissue lesions in, **241–258**  
    with HIV disease, orofacial disorders in, **259–271**  
Crohn's disease, 36  
    and orofacial granulomatosis, 215–216  
    clinical findings in, 214–216

- Crohn's disease (*continued*)
  - diagnostic tests in, 216
  - gene mutations in, 214
  - treatment and prognosis in, 216–217
- Cryotherapy, in oral mucositis, 180
- Cryptococcosis, 57
- Cyst(s), lateral periodontal, 234
  - pediatric oral, 254–255
- Cytomegalovirus, 24–25

## D

---

- Dentures, fibrous hyperplasia induced by, 235–236
- Dermatitis herpetiform, juvenile, 249–250
- Drug-induced pigmentations, 198
- Drug reactions, lichenoid, 86
- Dysplasia, oral, and malignant transformation, 152
  - Minnesota dentist's follow-up of, 151

## E

---

- Ecchymosis, 190
- Echinocandins, 63
- Endocrine disorders, pigmented lesions related to, 199–200
- Ephelis, 187–188
- Epidermolysis bullosa, hereditary, 249
- Epstein-Barr virus, 25–26
- Epulis, congenital, 252
- Erythema migrans, 7–8
- Erythema multiforme, **67–76**
  - classification of, 67–68
  - clinical presentation of, 69–72
  - diagnosis of, 72
  - etiology of, 68
  - features of, 67
  - treatment of, 73–74
- Erythroleukoplakia, 348, 352, 363
- Erythroplasia, 155
  - with ulceration, 155

## F

---

- Fibroma, irritation, 223–224
  - peripheral ossifying, 231–232
  - traumatic, 223–224
- Fibromatosis, gingival, 228–229

- Fibrous hyperplasia, denture-induced, 235–236
- Fine-needle aspiration, 158
- Fissured tongue, 10
- Fordyce granules, of labial and buccal mucosa, 4, 5
- Fungal infections, oral, **49–65**
  - deep, 56–58
    - diagnosis of, 58–59
  - superficial, 49–50
  - treatment of, 59–63

## G

---

- Geographic tongue, 7–8
- Geotrichosis, 57–58
- Gingiva, retrocuspid papilla of, 3
- Gingival overgrowth, generalized, 232–234
- Gingivitis, acute necrotizing ulcerative, in children, 241–242
- Gingivostomatitis, primary herpetic, in children, 243, 244
- Glossitis, benign migratory, 7–8
- Granuloma, peripheral giant cell, 230–231
  - pyogenic, 229–230, 252
- Granulomatosis, orofacial, causes of, 217
  - clinical findings in, 217–218
  - Crohn's disease and, 216–217
  - diagnostic tests in, 218
  - treatment and prognosis in, 219
- Granulomatous diseases, immune-mediated granulomatous inflammation and, 205–206
  - in foreign body reactions, 204–205
  - of oral tissues, **203–221**
    - common, 204

## H

---

- Hairy tongue, 9–10
- Hand-foot-and-mouth disease, in children, 245
- Head and neck, cancer of, incidence of, 143, 144
  - TMN staging of, 146
  - manifestations of lupus erythematosus in, 137–138
- Heavy-metal pigmentation, 198
- Heck's disease, in children, 247

- Hemangioma(s), 195–196  
congenital, intraoral, 252
- Hematologic disorders, in lupus erythematosus, 137
- Hematoma, 190
- Hemochromatosis, 199–200
- Herpangina, in children, 244, 245
- Herpes simplex infection(s), cytology  
smears in, 21  
differential diagnosis of, 20–21  
immunomorphologic tests in, 21  
primary, 16–17  
recurrent, 17–20  
serologic tests in, 21–22  
virologic tests in, 21
- Herpes simplex virus, 16
- Herpes zoster, 22–24
- Herpetic infections, oral (HSV 1-8),  
**15–29**
- Histoplasmosis, 57
- HIV disease, pediatric, classification system  
for, 260–261, 263, 264  
factors influencing, 259  
incidence of, 259–260  
oral lesions in, classification of,  
261–263, 265  
epidemiology of, 264–268  
treatment modalities for,  
268–269  
orofacial disorders in, **259–271**  
orofacial manifestations of, 261
- Human herpes virus 6, 26
- Human herpes virus 7, 26
- Human herpes virus 8, 27

---

## I

- Imidazoles, 59–61
- Incisive papilla cyst, 254–255
- Infantile febrile mucocutaneous lymph node syndrome, acute, 250
- Infection(s), bacterial, of pediatric soft tissue, 241  
fungal. See *Fungal infections*.  
in lupus erythematosus, 136–137

---

## K

- Kaposi's sarcoma, 196–197
- Kawasaki disease, 250

---

## L

- Laser therapy, in oral mucositis, 180
- Lentigo, 188
- Leukoedema, of labial and buccal mucosa,  
3–4
- Leukoplakia, 144, 149, 150  
chemoprevention of, 160  
cytology and brush biopsy of,  
157–158  
diagnosis and management of,  
156–157  
follow-up examination in, 160  
oral cancer, and squamous cell  
carcinoma, **143–165**  
proliferative verrucous, 155–156  
stained with toluidine blue, 158, 159  
treatment of, 160–161
- Lichen planus, as premalignant lesion,  
84–86  
cause and pathogenesis of, 78–79  
clinical features of, 79–80  
diagnosis of, and histopathologic  
features of, 81–83  
epidemiology of, 77  
erosive, 80, 81  
oral, 148  
plaque-like, 81  
reactions in, diseases, drugs and  
materials implicated in, 85  
reticular, 80  
treatment of, 83–84
- Lichenoid drug reactions, 86  
lichen planus, and lichenoid mucositis,  
**77–89**
- Lichenoid mucositis, lichen planus, and  
lichenoid drug reactions, **77–89**
- Linea alba buccalis, of labial and buccal  
mucosa, 5
- Linear IgA disease, childhood, 248–249
- Lipoma, 234–235
- Lip(s), commissural lip pits of, 1–2  
ephelides of, 2  
labial varices of, 2–3
- Lupus erythematosus, acute cutaneous, 132  
antiphospholipid syndrome in, 137  
cardiovascular disease in, 136  
chronic cutaneous, 129–132  
clinical features of, 129  
epidemiology of, 127  
head and neck manifestations of,  
137–138  
hematologic disorders in, 137  
infection in, 136–137

- Lupus erythematosus (*continued*)  
 manifestations of, and impact on  
   dental care, 130  
 mucocutaneous disease in, 129  
   treatment of, 134–135  
 mucosal lesions in, 132–133  
 neuropsychiatric manifestations of,  
   135  
 oral manifestations of, **127–141**  
 pathogenesis of, 127–129  
 renal disease in, 135  
 subacute cutaneous, 131
- Lymphangioma, 195, 252–253
- Lymphoid tissue, hyperplastic, 11–12

## M

---

- Measles, in children, 246
- Melanoacanthoma, 195
- Melanoma(s), oral mucosal, 193–195
- Melanoplakia, 187
- Melanosis, 187
- Melanotic macules, 188–189
- Melanotic neuroectodermal tumor of  
 infancy, 253
- Morsicatio buccarum, of labial and buccal  
 mucosa, 5–6
- Mouth, floor of, lingual varicosities of, 12
- Mucocele(s), 191, 224–226  
 in children, 242–243
- Mucormycosis, 58
- Mucosa, labial and buccal, fordyce granules  
 of, 4, 5  
   leukodema of, 3–4  
   linea alba buccalis of, 5  
   morsicatio buccarum of, 5–6  
   traumatic ulcer of, 6–7  
 oral, structure and appearance of,  
   variations of, **1–14**
- Mucositis, oral, **167–184**  
 anti-inflammatory agents in,  
   177–178  
 antimicrobial agents in, 178–179  
 antioxidants in, 179–180  
 as complication of  
   chemotherapy, 168–169  
 clinical presentation of, 170–171  
 cryotherapy in, 180  
 diagnosis of, 172–173  
 growth factors in, 177  
 laser therapy in, 180  
 management of, 174–180

- measurement of, 173–174  
 nutritional support in, 179  
 oral hygiene in, 174–176  
 pain control in, 176  
 pathogenesis of, 169–170  
 radiation therapy in, 167  
 topical coating agents in, 179

Mumps, in children, 246

## N

---

- Neutropenia, congenital, 255
- Nevus(i), 192–193
- Nutrition, and oral cancer, 148
- Nystatin, 62

## O

---

- Oral lesions, chronic and recurrent, in  
 children, 248–251  
   in children, trauma as cause of,  
   247–248
- Oral mucosa, structure and appearance of,  
 variations of, **1–14**
- Orofacial disorders, in children with HIV  
 disease, **259–271**
- Orofacial granulomatosis. See  
*Granulomatosis, orofacial.*

## P

---

- Palate, hard and soft, tori and exostoses of,  
 13
- Papillary lesion, oral, 226–228
- Papillomavirus, human, 227–228
- Paraneoplastic pemphigus. See *Pemphigus,*  
*paraneoplastic.*
- Pemphigoid, bullous, juvenile, 248  
 mucous membrane, **91–106**  
   clinical presentation of, 93–94  
   diagnosis of, 95–100  
   epidemiology of, 92  
   management of, 100–103  
   pathophysiology of, 94–95, 96
- Pemphigus, **107–125**  
 paraneoplastic, clinical presentation  
   of, 117–118  
   criteria for diagnosis of,  
   114–116  
   epidemiology of, 116  
   laboratory tests in, 118  
   pathophysiology of, 116–117  
   treatment of, 119

Pemphigus vulgaris, clinical presentation of, 109–111  
 epidemiology of, 107–108  
 laboratory tests in, 111–114  
 pathophysiology of, 108–109  
 treatment of, 114

Petechia, 190, 191

Peutz-Jeghers syndrome, 200

Pharyngitis, acute lymphonodular, in children, 244–245

Pigmentation, physiologic, 186–187

Pigmented lesions, drug-induced, 198  
 of benign, non-neoplastic hematologic or vascular origin, 189–191  
 of oral cavity, **185–201**  
   evaluation of, diagnostic approach in, 185–186  
   of benign and malignant neoplastic melanocytic origin, 192–193  
   of benign and malignant neoplastic vascular origin, 195–197  
   of benign melanocytic origin, 186–187  
   originating in salivary glands, 191  
   related to endocrine disorders, 199  
   related to exogenous deposits, 197–198  
   related to systemic diseases, 199–200

Polyenes, 62

Purpura, 190

Pyogenic granuloma, 229–230

Pyrimidines, 63

## R

Ranula, 191–192

Recurrent aphthous stomatitis. See *Aphthous stomatitis, recurrent*.

Renal disease, in lupus erythematosus, 135

Riga-Fede disease, 253

Rubeola, in children, 246

## S

Salivary glands, pigmented lesions originating in, 191

Sarcoidosis, as genetically heterogeneous disease, 210  
 clinical findings in, 210–212

diagnostic tests in, 212–213  
 treatment and prognosis in, 213–214

Sialadenitis, acute viral, in children, 246  
 bacterial, in children, 242, 243

Soft tissue lesions, pediatric, **241–258**  
 as manifestations of systemic disease, 255

Soft tissue masses, oral, common benign, **223–240**

Squamous cell carcinoma, oral cancer, and leukoplakia, **143–165**

Stevens-Johnson syndrome, 67  
 clinical presentation of, 69–72  
 diagnosis of, 73  
 etiology of, 68  
 treatment of, 73–74

Stomatitis, recurrent aphthous. See *Aphthous stomatitis, recurrent*.

Systemic lupus erythematosus. See *Lupus erythematosus*.

## T

Telangiectasia, 190–191

Thrombocytopenic purpura, idiopathic, 255

Thyroglossal duct cyst, 254

Thyroid, lingual, 8–9

Thyroid nodules, lingual, 8–9

Tobacco use, oral cancer and, 147–148

Toluidine blue, leukoplakia stained with, 158, 159

Tongue, crenations of, 11  
 fissured, 10  
 geographic, 7–8  
 hairy, 9–10

Toxic epidermal necrolysis, 67  
 clinical presentation of, 72–72, 73  
 diagnosis of, 73  
 etiology of, 68  
 treatment of, 73–74

Triazoles, 61–62

Tuberculosis, clinical findings in, 207–208  
 diagnostic tests in, 209  
 susceptibility to, 206–207  
 treatment and prognosis in, 209

## U

Ulcer, traumatic, of labial and buccal mucosa, 6–7

**V**

---

Varicella, 22  
in children, 245–246

Varicella zoster virus, 22

Varicosity, 189–190

Verruca vulgaris, 227, 228

Viral infections, in children, 243

Virtigo, in children, 250

Viruses, in development of oral cancer, 148
